

Made-to-measure, ready-to-wear software

K3 Fashion is a concept-to-consumer solution, embedded in Microsoft Dynamics 365 Finance, Supply Chain Management and Commerce, that optimises inventory and distribution processes to drive profitability with real-time planning capabilities.

K3 Fashion is seamlessly embedded within the D365 environment to remove the need for manual coverage and technical maintenance, while following Microsoft's release schedule to ensure immediate ROI and fluidity for end-users.

With out-of-the-box functionality, users benefit from standardised processes aligned to the fashion industry that deliver operational efficiency at scale, all framed through a subject matter expertise lens adhering to Microsoft's core processes and framework. Furthermore, our platform eliminates the need to source external technical inputs, APIs, and plug-ins to minimise complexity while boosting efficiency.

And since K3 exclusively focuses on the fashion and apparel industry, our development approach solely surrounds solving unique industry-specific challenges. This ensures a bespoke platform is presented from day one with points of flexibility offered to fit nuanced brand needs.

In other words: It doesn't matter where your company sits in the concept-to-consumer journey – be that in design, planning, sales, procurement, manufacturing or distribution – because you can run your entire business through one, fully integrated software solution.

K3 Fashion supports business processes by offering feature-rich presales functionality, including planning, design, sourcing, purchasing, logistics, warehousing and financial warehousing.

The concept-to-consumer fashion solution

Here's a quick look at what processes K3 Fashion supports:

- 
- ✓ Inventory and Warehouse Management
 - ✓ Season Management
 - ✓ Item Management
 - ✓ Product Lifecycle Management
 - ✓ Product Data Management
 - ✓ Order Management
 - ✓ Manufacturing
 - ✓ Price and Cost Management
 - ✓ Retail and Commerce
 - ✓ Insights and Intelligence
 - ✓ Business Planning
 - ✓ Power Platform
 - ✓ Sustainability

Inventory and Warehouse Management

K3 Fashion's Inventory and Warehouse Management encompasses a range of functionalities that offer significant benefits, like efficient creation and maintenance, centralised data management, enhanced visibility, improved collaboration and streamlined operations.

Key aspects include:

Efficient Creation and Maintenance

Seamlessly handle item and product management within D365 Finance, SCM and Commerce to streamline the processes of creating, updating, and maintaining items and products in your inventory.

Centralised Data Management

The integration between K3 Fashion and D365 Finance, SCM, and Commerce functionalities enable centralised data storage to ensure consistency and accuracy across supply chain operations.

Enhanced Visibility

Gain real-time visibility into item and product inventory, enabling better tracking, forecasting, and planning to make smarter decisions based on accurate stock information.

Improved Collaboration

Facilitate collaboration between teams involved in item management, including design, production, and purchasing while ensuring seamless coordination and communication across departments.

Streamlined Operations

Efficiently handle item and product-related tasks, such as pricing, categorisation, and attributes, within a unified platform to reduce manual effort, eliminate redundancies, and enhance operational efficiency.

Features and Benefits:

Matrices

K3 Fashion's matrix framework simplifies purchasing, receiving, transferring, and selling products in multiple variants without processing at the lowest level. It enhances data entry speed and visibility, offers stock information, and seamlessly integrates with product status functionality.

Variant Information

K3 Fashion enriches standard variant groups by incorporating fashion-specific attributes, catering to the unique needs and demands of the fashion industry, thereby enhancing product management and versatility.

Prepacks

K3 Fashion's Prepacks are self-contained items comprising multiple sizes, colours, and fits that enable efficient product management. They can be treated as distinct products and easily packed or unpacked as required to enhance flexibility and inventory control.

Aggregated View

K3 Fashion provides aggregated views in standard forms for products with varying sizes, colours, and fits, offering users a convenient and comprehensive overview of lines at the desired level, facilitating effortless management and enabling simultaneous modifications to multiple lines for increased efficiency.

Ratio Curves

K3 Fashion simplifies the handling of total combined or exact quantities per size and/or fit. The ratio curves functionality enables predefined partitions, easy data entry and eliminates manual creation of divisions to boost efficiency.

Matrix-related Reports

K3 Fashion's matrix-related reports enhance data visualisation, facilitate comprehensive analyses, and helps foster informed decision-making for improved business performance.

Features and Benefits:

Style Management

K3 Fashion's Style Management streamlines the entire process of creating a base product as a template for seasonal variations. This enables efficient product development, reduces time-to-market, and ensures consistency in design.

Product Dimensions

K3 Fashion's Product Dimensions functionality enables precise inventory management, accurate order fulfilment, improved customer satisfaction, and streamlined operations.

Product Hierarchies

K3 Fashion's hierarchies structure and organise products in a manner that aligns with specific processes, facilitating streamlined workflows, efficient categorisation, and enhanced clarity for seamless management and improved operational efficiency.

Product Wizard

K3 Fashion's Product Wizard enables users to effortlessly and swiftly create products, streamlining the process, saving time, and enhancing productivity.

Season Management

K3 Fashion's Season Management capabilities enable efficient product filtering, customised system responses, enhanced planning and forecasting, and optimised customer experiences to drive success.

Key aspects include:

Efficient Product Filtering

Seasons can be used within K3 Fashion to filter and categorise products and facilitate streamlined business processes. This functionality ensures that products specific to a season can be easily identified and utilised.

Customised System Response

The system can be configured to respond differently based on the seasonality of products, thereby enabling tailored workflows, pricing, promotions, and inventory management to align with the demands and trends of each season.

Enhanced Planning and Forecasting

Increased planning and forecasting accuracy enables historical data and market trend analysis to drive smarter decisions about inventory levels, production schedules, and marketing strategies tailored to each season.

Optimised Customer Experience

Align product offerings with seasonal preferences, ensuring a more personalised and relevant customer experience while also showcasing the right products at the right time to further enhance customer satisfaction and loyalty.

Competitive Edge

Capitalise on seasonal opportunities and stay ahead of competitors by promptly responding to changing market demands and leveraging seasonal trends.

Features and Benefits:

Product Status

With the Product Status feature, businesses can effortlessly block or unblock predefined processes for specific products and variants, ensuring smooth operations aligned with each product's lifecycle while promoting efficiency and compliance.

Seasons and Drops

K3 Fashion's Seasons and Drops functionality streamlines operations, improves planning and coordination, enhances efficiency, and empowers businesses to stay ahead of the market.

Collection Management

K3 Fashion's Collection Management enables seamless monitoring of product creation within the collection and provides a visual representation through a comprehensive line plan.

Product Lifecycle Management

K3 Fashion's Product Lifecycle Management functionality ensures that companies can better plan and manage their collections. It enables streamlined collection management, enhanced collaboration, improved time-to-market, greater inventory management, and data-driven insights.

Key aspects include:

Streamlined Collection Management

Seamlessly manage the entire product lifecycle within D365 Finance, SCM and Commerce from the initial concept to the finished article.

Enhanced Collaboration

Foster collaboration among teams involved in collection planning and management while enabling seamless communication, document sharing, and task coordination to ensure everyone is aligned throughout the lifecycle.

Improved Time-to-Market

Optimise the collection planning process and reduce time-to-market. Efficiently track and manage tasks, milestones, and deadlines, ensuring timely delivery of collections to the market.

Better Inventory Management

Gain visibility into the collection lifecycle, enabling accurate inventory planning and management. Optimise stock levels, reduce excess inventory and ensure availability of products as per demand.

Data-driven Insights

Utilise data captured throughout the product lifecycle to gain valuable insights. Analyse performance, identify trends and make informed decisions to drive business growth and profitability.

Features and Benefits:

Product Lifecycle Management

The Product Lifecycle Management functionality empowers fashion companies to strategically plan and oversee their entire collection journey, from the initial concept to the final product's inclusion. These comprehensive features streamline operations, enhance collaboration and ensure efficient management.

PLM Vendor Portal

K3 Fashion's PLM Vendor Portal facilitates vendor engagement throughout a product's lifecycle. This collaboration enhances efficiency, transparency, and communication, streamlining processes and empowering vendors to contribute seamlessly for optimal product development and success.

Product Data Management

K3 Fashion's Product Data Management capabilities empower businesses to easily create and maintain fashion-specific data, enabling tailored data management, accurate information, enhanced decision-making, streamlined workflows, and improved collaboration.

Key aspects include:

Tailored Data Management

K3 Fashion's Product Data Management enables the creation and maintenance of fashion-specific data within D365 Finance, SCM and Commerce.

Accurate and Consistent Information

Maintain fashion-specific data in a central repository, promoting accuracy and consistency throughout the supply chain. Ensure that product attributes, classifications, and other essential details are up-to-date and readily accessible.

Enhanced Decision-making

Leverage fashion-specific data to make informed decisions in inventory management, production planning, and sales strategies. Gain valuable insights into product performance, trends, and customer preferences.

Streamlined Workflows

Seamlessly integrate fashion-specific data management within D365 Finance, SCM and Commerce to streamline workflows. Simplify tasks such as product creation, updates, and tracking to reduce manual effort and enhance operational efficiency.

Improved Collaboration

Facilitate collaboration among teams involved in Product Data Management, enabling smooth communication and coordination. Ensure that all stakeholders have access to accurate and relevant fashion-specific data.

Features and Benefits:

Product Data Details

K3 Fashion's Product Data Details enhance clarity, efficiency, and inform decision-making, helping to optimise overall business operations.

Wash & Care Instructions

The Wash & Care instructions empower customers to take care of their purchases, enhancing durability, preserving quality, and maximising customer satisfaction.

Compositions

K3 Fashion's Compositions offer transparency and clarity, enabling informed purchasing decisions, ensuring product quality that adheres to regulatory requirements.

Measurements

K3 Fashion's Measurements functionality offers valuable insights, enabling accurate tracking, analysis, and informed decision-making to improve product management and customer satisfaction.

Product Instructions

K3 Fashion's Product Instructions ensure improved efficiency, accuracy, and consistency, empowering users to carry out tasks effectively.

Brands

K3 Fashion enhances brand management, facilitates effective categorisation, and strengthens brand recognition to drive customer loyalty and boost sales.

Features and Benefits:

Picture Handling

K3 Fashion's Picture Handling provides enhanced visual representations, simplifies product management, and enables efficient browsing and selection for improved customer experience.

Variant Details

K3 Fashion enhances standard variant groups by incorporating fashion-specific attributes, enabling businesses to effectively manage variant-related requirements and ensure accurate representation of product versions.

Quality Control

K3 Fashion's Quality Control functionality ensures customer satisfaction, minimises returns, and upholds brand reputation by enabling the consistent delivery of superior quality products.

TechPack

TechPacks streamline communication, facilitate collaboration, and ensure accuracy and consistency in product development to enhance efficiency and support the creation of high-quality fashion products.

Product Image Uploader

K3 Fashion offers the convenience of importing fashion product images directly from URLs, Azure Blob and Azure Share. These images can be easily linked to products in D365 Finance, Supply Chain Management, and Commerce, with the added advantage of synchronising them to POS and Web Shop platforms.

Order Management

K3 Fashion's Order Management delivers streamlined order processing, enhanced customer satisfaction, improved inventory management, efficient order tracking and communication, and data-driven insights to ensure excellence in a competitive environment.

Key aspects include:

Streamlined Order Processing

Seamlessly manage the entire order lifecycle within D365 Finance, SCM and Commerce, from order placement to fulfilment, ensuring smooth and efficient order processing.

Enhanced Customer Satisfaction

Deliver exceptional customer experiences by efficiently managing orders, ensuring accurate and timely order fulfilment, and providing visibility into customer order statuses.

Improved Inventory Management

Gain real-time visibility into inventory levels, enabling better order allocation and stock management while preventing stockouts or overstocks.

Efficient Order Tracking and Communication

Enable customers and internal teams to track and communicate order statuses and updates in real time, ensuring transparency and proactive customer service.

Data-driven Insights

Leverage order management data to gain valuable insights into customer behaviour, purchasing patterns, and demand forecasting. Make informed decisions to optimise inventory planning and drive sales growth.

Features and Benefits:

Order Categories

K3 Fashion's Order Categories enhances efficiency, streamlines workflows, and facilitates better order management to optimise operational effectiveness and customer satisfaction.

Credit Limit Control

Credit Limit Control provides enhanced financial management, prevents excessive credit risks, and ensures prudent sales decisions, helping to safeguard business profitability and customer relationships.

Sample Management

K3 Fashion's Sample Management improves efficiency, enhances organisation, and enables better control over sample inventory to ensure the seamless handling of samples and optimise the overall sourcing workflow.

Customer Agreements

In K3 Fashion, customer agreements comprise tailored process-specific agreements assigned to individual customers. This approach brings numerous benefits, including personalised service delivery, streamlined processes, and enhanced customer satisfaction to foster a mutually beneficial relationship.

Master Range Planning (MRP) Aggregated Views

MRP Aggregated Views offer a clear overview to simplify complex information and enable informed decision-making to enhance efficiency and productivity.

Consignment

The Consignment feature in K3 Fashion empowers companies to efficiently manage and gain visibility into customers' inventory while retaining ownership. This capability ensures optimal inventory control, improved customer service, and enhanced profitability by balancing ownership and customer needs.

Features and Benefits:

Ringfencing

In K3 Fashion, Ringfencing empowers businesses to define predetermined sellable quantities per customer, customer group, country, or region, ensuring accurate tracking and validation during sales order entry.

Order Change Management

K3 Fashion's Order Change Management streamlines order modifications, enhances operational flexibility, and improves responsiveness to changing business requirements, ultimately fostering greater efficiency and customer satisfaction.

Vendor Portal

K3 Fashion's Vendor Portal empowers vendors to seamlessly access and engage with all relevant fashion processes they are involved in to enhance collaboration, improve communication and enable efficient vendor management.

Vendor Capacity

During order entry and confirmation, quantities can be cross-checked against the defined capacity, ensuring efficient resource allocation and preventing overcommitment.

Manufacturing

K3 Fashion's Manufacturing capabilities streamline production processes, improve manufacturing efficiency, enhance supply chain visibility, reduce costs, and enable effective quality control to ensure success.

Key aspects include:

Streamlined Production Processes

Seamlessly manage and track the entire production lifecycle within D365 Finance, SCM and Commerce, ensuring efficient production planning, scheduling, and execution.

Improved Manufacturing Efficiency

Optimise manufacturing operations by leveraging integrated functionalities for capacity planning, resource allocation, and production monitoring to enhance overall manufacturing efficiency.

Enhanced Supply Chain Visibility

Gain real-time visibility into the production status, allowing for better coordination with suppliers, timely delivery of raw materials, and improved supply chain responsiveness.

Cost Reduction

Identify cost-saving opportunities by leveraging production and manufacturing functionalities to streamline operations, minimise waste, and optimise resource utilisation.

Quality Control

Implement robust quality control measures within the production process to adhere to quality standards, reduce defects, and enhance customer satisfaction.

Features and Benefits:

Master Production Orders

K3 Fashion's Master Production Orders simplify the processing of individual orders, facilitate streamlined production management, and provide enhanced visibility.

BOM Models

In K3 Fashion, users can leverage this feature to establish predefined BOM templates and rules, ensuring the streamlined creation of variant-specific Bill of Materials and routes. This capability enhances efficiency, standardisation, and accuracy in the production process, enabling seamless variant-specific manufacturing.

Price and Cost Management

K3 Fashion's Price and Cost Management features enable efficient pricing strategies, cost optimisation, accurate profit analysis, competitive pricing, and real-time cost visibility to drive profitability and competitiveness.

Key aspects include:

Efficient Pricing Strategies

Seamlessly manage pricing strategies and promotions within D365 Finance, SCM and Commerce, enabling dynamic pricing based on market conditions, customer segments, and competitive factors.

Cost Optimisation

Leverage integrated cost management functionalities to analyse and control costs throughout the supply chain, identifying cost-saving opportunities and improving profitability.

Accurate Profit Analysis

Gain insights into product-level profitability by tracking costs, pricing, and sales performance. Make informed decisions to maximise profits and optimise product mix.

Competitive Pricing

Analyse market trends, competitor pricing, and customer demand to set competitive prices, ensuring market relevance and a competitive advantage.

Real-time Cost Visibility

Obtain real-time visibility into cost components, such as materials, labour, and overheads, enabling better cost control and informed decision-making.

Features and Benefits:

Recommended Retail Price

K3 Fashion's RRP functionality ensures accurate pricing strategies, streamlines international sales and optimises profitability by aligning prices with specific markets and customer preferences.

Markdown Modelling

K3 Fashion's Markdown Modelling empowers users to make data-driven pricing decisions, enhancing profitability and optimising inventory management.

Costing and Pricing

K3 Fashion's Costing and Pricing facilitates accurate determination of cost prices, sales prices, and Recommended Retail Prices, ensuring optimal pricing strategies and improved profitability.

Margin Planning and Control

K3 Fashion's Margin Planning and Control enables users to define sales and purchase margins. During Sales and Purchase Order entry, these margins can be verified, offering benefits such as improved profitability, accurate pricing, and streamlined order processing by warning or blocking entries when necessary.

Retail and Commerce

The integration of retail and commerce functionalities within K3 Fashion and Dynamics 365 Supply Chain Management enables a seamless omnichannel experience, efficient order fulfilment, personalised customer engagement, centralised inventory management, and comprehensive sales analysis.

Key aspects include:

Seamless Omnichannel Experience

Deliver a seamless shopping experience across multiple channels, integrating online and offline retail operations within D365 SCM. Enable customers to shop conveniently and interact with your brand through various touchpoints.

Efficient Order Fulfilment

Streamline order processing and fulfilment, ensuring accurate and timely delivery of products to customers. Optimise inventory allocation and fulfilment strategies to meet customer expectations.

Personalised Customer Engagement

Leverage customer data and insights to offer personalised recommendations, promotions, and loyalty programmes. Enhance customer engagement, satisfaction, and loyalty through targeted marketing initiatives.

Centralised Inventory Management

Gain real-time visibility into inventory levels across all retail channels, enabling effective stock management to prevent stockouts and reduce excess inventory.

Comprehensive Sales Analysis

Analyse sales data, customer behaviour, and market trends to gain valuable insights into product performance, pricing strategies, and demand forecasting. Make data-driven decisions to drive revenue growth and profitability.

Features and Benefits:

Microsoft Point of Sale Enhancements

K3 Fashion's enhancements enable users to establish and synchronise fashion-specific data and processes within Microsoft's POS. This integration enhances operational efficiency, improves customer experiences, and enables seamless management of fashion-related transactions at the point of sale.

Microsoft Web Shop Enhancements

K3 Fashion's enhancements to the Microsoft Web Shop empowers users to configure and synchronise fashion-specific data and processes. The benefits of this include seamless integration, enhanced customer experiences, and efficient management of online fashion sales.

Generic eCommerce Integration

K3 Fashion encompasses all essential functionalities for seamless eCommerce integration, catering specifically to fashion-related data and processes. This comprehensive integration streamlines operations, enhances customer experiences, and drives business success in the digital fashion landscape.

Insights and Intelligence

The combination of insights and intelligence within K3 Fashion and Dynamics 365 Supply Chain Management empowers businesses with data-driven decision-making, predictive analytics, operational efficiency, personalised customer experiences, and a competitive edge in the dynamic fashion industry.

Key aspects include:

Data-driven Decision-making

Leverage the power of insights and intelligence, integrated with D365 SCM and K3 Fashion, to gain deep visibility into critical business metrics, sales trends, and customer behaviour. Make informed decisions backed by actionable insights.

Predictive Analytics

Utilise advanced predictive analytics capabilities to forecast demand, optimise inventory levels, and anticipate market trends. Enhance supply chain management and minimise stockouts or overstocks.

Operational Efficiency

Insights and intelligence combined with D365 SCM and K3 Fashion provide real-time data integration and analysis, enabling seamless coordination across departments. Improve efficiency in areas such as inventory management, production planning, and order fulfilment.

Personalised Customer Experiences

Leverage customer data insights to deliver personalised experiences through targeted marketing campaigns, tailored product recommendations, and superior customer service.

Competitive Edge

Gain a competitive advantage by leveraging data-driven insights and predictive analytics. Make proactive decisions, optimise operations, and respond swiftly to market changes.

Features and Benefits:

Image Recognition

K3 Fashion's image recognition functionality provides users with advanced visual analysis, improved efficiency, and enhanced decision-making to offer unparalleled precision and ingenuity.

Translation Services

K3 Fashion utilises an automated translation service to ensure that all labels can be effortlessly translated. Supported languages include English, Dutch, French, Italian, German and Spanish.

Telemetry, Licensing and Data

K3 Fashion's telemetry, licensing and data functionality enables businesses to collect telemetry data from every D365 Finance, Supply Chain Management and Commerce instance, providing valuable insights into the solution's usage.

Forecasting

K3 Fashion's Artificial Intelligence and Machine Learning capabilities enable businesses to optimise inventory management, enhance decision-making, and make data-driven decisions to foster greater efficiency and profitability.

Generic AI

K3 Fashion leverages foundational and overlapping Artificial Intelligence capabilities to enable more specific AI functions, ultimately driving enhanced efficiency, accuracy, and innovation.

Business Planning

K3 Business Planning, integrated with Dynamics 365 Supply Chain Management, empowers users with the ability to create multiple plans across various areas within the system. By leveraging this integration, users benefit from comprehensive planning capabilities, flexible plan creation, versatile fields, streamlined operations, and informed decision-making.

Key aspects include:

Comprehensive Planning

Define plans for different areas, such as Sales, Purchase, Production, and Projects, ensuring a holistic approach to business planning within D365 SCM.

Flexible Plan Creation

Create plans on any user-defined level, such as fiscal year, product category, customer group, or country, adapting to the specific needs and hierarchy of your business.

Versatile Fields

Define fields like revenue, quantities, margin, and average price to track and analyse key performance indicators relevant to your business operations.

Streamlined Operations

Seamlessly integrated with D365 SCM, K3 Business Planning eliminates manual effort, improves data accuracy, and streamlines planning processes, saving time and resources.

Informed Decision-making

With comprehensive plans and real-time data, gain valuable insights to make informed decisions, enhance forecasting accuracy, and drive proactive actions in your supply chain.

Features and Benefits:

Company-specific Business Planning

K3 Business Planning facilitates accurate calculation of actuals, providing a clear view of actuals versus planned values, to enable informed decision-making and precise financial analysis.

Global Business Planning

Global Business Planning enables users to better coordinate planning, ensure consistency, efficiency, and improve financial analysis on a global scale.

Power Platform

The integration between Microsoft Power Platform, Dynamics 365 Supply Chain Management and K3 Fashion offers a plethora of business benefits. These include streamlined operations, enhanced collaboration, personalised customer experiences, advanced analytics, and the flexibility to scale and adapt in a dynamic industry.

Key aspects include:

Streamlined Operations

Seamlessly combine Power Platform, D365 SCM, and K3 Fashion to optimise and automate various fashion-related processes, such as inventory management, order fulfilment, and supply chain operations. Experience increased operational efficiency and reduced time-to-market.

Enhanced Collaboration

Power Platform's connectors enable seamless data integration between D365 SCM and K3 Fashion, fostering better collaboration among teams. This ensures a unified view of critical information, facilitating smoother communication and decision-making.

Personalised Customer Experiences

Leverage Power Platform's low-code capabilities to create custom applications, workflows, and customer-facing portals tailored to the fashion industry. Deliver personalised experiences that resonate with your customers and drive loyalty.

Advanced Analytics

Utilise Power BI, a component of Power Platform, to gain valuable insights from D365 SCM and K3 Fashion data. Analyse sales trends, customer preferences, and inventory patterns to make data-driven decisions and optimise operations.

Scalability and Flexibility

The combined power of Power Platform, D365 SCM, and K3 Fashion ensures scalability and adaptability to accommodate business growth and evolving market demands. Seamlessly integrate additional Microsoft tools to expand capabilities and drive business success.

Features and Benefits:

Power BI

K3 Fashion's integration with Power BI enables advanced data visualisation and analytics, empowering users to make informed decisions and drive business triumphs with utmost precision and efficiency.

Power Apps

K3 Fashion's integration with Microsoft's Power Apps allows users to benefit from streamlined workflows, seamless data management, and enhanced productivity, helping to foster a more efficient and successful business environment.

Sustainability

K3 Fashion's Sustainability functionality enables businesses to better manage their environmental responsibility, supply chain transparency, social impact, sustainable product innovation, and reputation.

Key aspects include:

Enhanced Environmental Responsibility

Integrate sustainability practices into fashion operations, enabling better management of resources, waste reduction, and carbon footprint mitigation.

Supply Chain Transparency

Gain visibility into the entire supply chain, ensuring ethical sourcing, responsible manufacturing, and compliance with sustainability standards. Foster transparency and build trust with customers and stakeholders.

Social Impact

Promote fair labour practices, worker welfare, and social responsibility throughout the supply chain. Ensure compliance with labour standards and support initiatives that uplift local communities.

Sustainable Product Innovation

Drive sustainable product development by integrating eco-friendly materials, manufacturing processes, and design principles. Meet the growing demand for sustainable fashion and appeal to environmentally conscious customers.

Reputation Enhancement

Showcase commitment to sustainability, foster positive brand images and standout from competitors to attract eco-conscious customers and strengthen brand loyalty.

Features and Benefits:

Corporate Social Responsibility Classifications

In K3 Fashion, CSR classifications can be established at multiple levels: fibres/composition, item, and vendor or production address. This enables businesses to effectively track and manage CSR-related information, fostering sustainability, ethical practices, and enhanced brand reputation.

K3 ViJi Integration

The integration between K3 ViJi and K3 Fashion empowers fashion businesses to enhance their ethical and sustainable practices. By offering comprehensive transparency of ESG data from source to consumer, it enables informed decision-making.

Working with a global network of partners and fueled by the desire for excellence in execution, K3 is a Microsoft Global ISV that strives to provide its customers with repeatable industry solutions built on Microsoft technology, that can, where necessary, be further tailored to meet their individual needs and deliver measurable business benefits.

K3 Fashion Solutions, a leading supplier of fashion business technology with more than 30 years of experience, develops industry-specific tools to support fashion workflows, improve customer experiences, and deliver sustainable growth throughout the supply chain.

Our solutions, K3 Fashion and K3 Pebblestone, are fully embedded in Microsoft's Dynamics 365 ERPs offering enterprise-grade support from design and production through to retail. As a top 20 GISV with a global footprint delivered through our network of Microsoft implementation partners, we are committed to supporting brands of all sizes.
