K3 Fashion
Manufacturing

K3 Fashion's Manufacturing capabilities streamline production processes, improve manufacturing efficiency, enhance supply chain visibility, reduce costs, and enable effective quality control to ensure success.
Key aspects include:

Streamlined Production Processes
Seamlessly manage and track the entire production lifecycle within D365 Finance, SCM and Commerce, ensuring efficient production planning, scheduling, and execution.

Improved Manufacturing Efficiency
Optimise manufacturing operations by leveraging integrated functionalities for capacity planning, resource allocation, and production monitoring to enhance overall manufacturing efficiency.

Enhanced Supply Chain Visibility
Gain real-time visibility into the production status, allowing for better coordination with suppliers, timely delivery of raw materials, and improved supply chain responsiveness.
Cost Reduction
Identify cost-saving opportunities by leveraging production and manufacturing functionalities to streamline operations, minimise waste, and optimise resource utilisation.
Quality Control
Implement robust quality control measures within the production process to adhere to quality standards, reduce defects, and enhance customer satisfaction.

Features and Benefits:

Master Production Orders
K3 Fashion's Master Production Orders simplify the processing of individual orders, facilitate streamlined production management, and provide enhanced visibility.

BOM Models
In K3 Fashion, users can leverage this feature to establish predefined BOM templates and rules, ensuring the streamlined creation of variant-specific Bill of Materials and routes. This capability enhances efficiency, standardisation, and accuracy in the production process, enabling seamless variant-specific manufacturing.
