K3 Pebblestone

Insights and Intelligence

Insights and Intelligence within K3 Pebblestone and D365 Business Central are augmented by several powerful features. The automate deployment functionality, for example, streamlines software rollout while the K3 Data Upgrade Framework ensures efficient data migration for users.

Features and Benefits:

Automate Deployment
K3 Pebblestone automates the process of software deployment, enabling efficient and consistent installation, configuration, and setup processes. These benefits reduce manual effort and accelerate time-to-value for organisations.

K3 Data Upgrade Framework
The K3 Data Upgrade Framework empowers users to separate upgrade data from the solution upgrade process. This proves especially valuable when dealing with large volumes of data that require upgrading.

K3 Fashion Solutions

K3 Fashion Solutions, a leading supplier of fashion business technology with more than 30 years of experience, develops industry-specific tools to support fashion workflows, improve customer experiences, and deliver sustainable growth throughout the supply chain.

Our solutions, K3 Fashion and K3 Pebblestone, are fully embedded in icrosoft's Dynamics 365 ERPs offering enterprise-grade support from design and production through to retail. As a top 20 GISV with a global footprint delivered through our network of Microsoft implementation partners, we are committed to supporting brands of all sizes.
